

STOCK MODE GUIDE

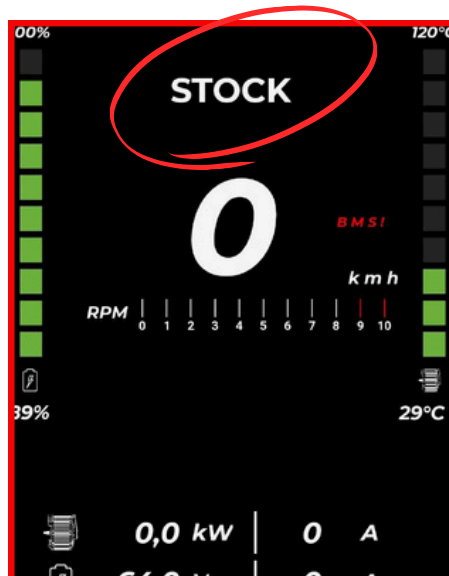

"Stock" Mode allows you to ride with the bike's original configuration.

How to see if Stock mode is active:

You can check if you're in Stock Mode by looking at the bike's display or the first screen of the Torp app.

3 s to activate
6 s do deactivate

How to exit Stock mode:

Using the Torp Display

Hold the "M" button for 6 seconds to exit Stock Mode.

Using the Brake Lever

Quickly press the brake lever 5 times and hold it slightly longer on the 6th press.

Note: This method works only within a few minutes after the bike is powered on.

Using the Torp App

Tap the "Stock" label on the app's first screen to exit Stock Mode.

STOCK MODE GUIDE

How to enter the Stock mode:

Using the Torp Display

Hold the "M" button for 3 seconds.

Using the Brake Lever

Quickly press the brake lever 5 times and hold it slightly longer on the 6th press.

Setting Stock mode to activate automatically:

Go to the 4th screen in the Torp app under "Additional Settings." Select "Active at Startup."

Note: If you turn this option off, you will need to manually exit Stock Mode (as described above) to prevent it from automatically activating when the bike starts.

Customizing Stock mode settings

You can adjust the Stock mode settings in the Torp app to suit your preferences:

Navigate to the 4th screen in the app and select "Additional Settings."
